Current Position

(From 1 November 2014 up to now) Associate Professor ING-INF/04 “Automatica”, University of Catania.

(From 1 November 2018 up to now) Coordinator of the Master Course in Automation Engineering and Control of Complex Systems at the University of Catania.

Educational Background

(24 July 1997) MSc in Computer Engineering, University of Catania.

(November 1997-October 2000) Ph.D. course in ‘Electronic and Control Engineering’, at the Dipartimento di Ingegneria Elettronica Elettronica e dei Sistemi (DIEES), University of Catania. Title defended on 29 January 2001.- Ph.D. Thesis - ‘Array of Fuzzy logic Based Dynamical Systems: The Role of Spatial Diversity’.

(January 1998) Professional Engineering Qualification.

Previous Positions and Professional Experiences

(1 February 2006-31 October 2014) Assistant Professor ING-INF/04 “Automatica”, University of Catania.

(October 2003 - January 2006) Post-Doctoral position working on ‘Nonlinear models for biosystems monitoring and control’ University of Catania, Dipartimento di Ingegneria Elettronica Elettronica e dei Sistemi.

(June- September 2008) Expert in Technology Innovation of ‘Instituto per la Promozione Industriale’ (IPI), auditing on the technology innovation demand of 17 Small and Medium Enterprises in Sicily, supported by Regional Project RESINT (Rete Siciliana Innovazione Tecnologica).

(November 2000 - September 2003) Contract Researcher, University of Catania, working on

- “DICTAM Project” supported by Europe Union;
- “Application of Advanced Techniques for Financial Data Analysis to Support Medium and Long Term Plan Activities” in collaboration and supported by ST-Microelectronics.

Patents

Patent n. 10201900010269 - "An electronic device, corresponding apparatus, method and computer program product".

Research Grants

(2017) Funding in the framework of call “CHANCE” supported by the University of Catania in relation to the project “Micro-Optofluidics: devices identification and strategic control applications”.

(2011-2013) Two years grant awarded to develop the research project entitled “Integration of Strategies for an Innovative Control of Microfluidics Systems and Applicative Validity” supported by MIUR, National Research Framework (Bando PRIN 2009). Role: *Principal Investigator and National Coordinator*.

(2011-2012) Two years grant awarded to develop the research project entitled “Graph-Theory Approach for the Identification of Large-Scale Dynamical Networks in Neuro-Cognitive Processes” supported by Ateneo Italo-Tedesco, Programma Vigoni (Bando 2010). Role: *Principal Investigator*.

(2010) Funding to have access to the “Integrated Nano-Microelectronics Clean Room” (ICTS) to develop the project “Microfluidic Control System based Micro-Bubble Logic and Optical Actuation”, in the program "GICSERV" supported by Consejo Superior De Investigaciones Cientificas, Spagna. Hosting Institution: Centro Nacional de Microelectronica (CNM), Universidad Autonoma de Barcelona, Spain. Role: *Principal Investigator*.

(2009) Funding to have access to the “Integrated Nano-Microelectronics Clean Room” (ICTS) to develop the project “*A Polymeric Device for Distributed Detection and Control in Microfluidics*”, in the program "GICSERV" supported by Consejo Superior De Investigaciones Cientificas, Spagna. Hosting Institution: Centro Nacional de Microelectronica (CNM), Universidad Autonoma de Barcelona, Spain. Role: *Principal Investigator*.

(2008) Research Project “Polymeric electro-optic device for the control of microfluidic processes” in the funding scheme ‘Progetti di Ricerca di Ateneo (PRA). Role: *Principal Investigator*.

(2008) One year grant awarded to develop the research project entitled “A platform for the support to diagnostic based by bio-potential” supported by Presidenza Segreteria Generale-Regione Sicilia. Role: *Principal Investigator*.

(2008) One year grant awarded to develop the research project entitled “Smart Home Healthcare systems for the elderly” supported by British Council and MIUR in the programme “British-Italian partnership programme for young researcher” (British 2008). Role: *Principal Investigator*.

(2007) Funding to have access in the “Integrated Nano-Microelectronics Clean Room” (ICTS) to develop micro-optic device in relation to the project “Monitoring and Control Systems for Microcirculatory Networks”, in the program "GICSERV" supported by Consejo Superior De Investigaciones Cientificas, Spain. Hosting Institution: Centro Nacional de Microelectronica (CNM), Universidad Autonoma de Barcelona, Spain. Role: *Principal Investigator*.

(2007) One year grant awarded to develop the research project entitled “Monitoring and control systems in microcirculation-Part II” supported by the University of Catania. Role: *Principal Investigator*.

(2007) Grant awarded to support a period at the University of Portsmouth studying on the research project entitled “Economic network and game theory” supported by the University of Catania. Role: *Principal Investigator*.

(2007) Grant awarded by the University of Catania to support for four month a MS Degree Student working at the University of Exeter, UK, to develop the research project entitled “Computational methodologies for Evoked Potentials spatio-temporal analysis in Neuro-engineering”. Role: *Principal Investigator*.

(2006) One-year grant awarded to develop the research project entitled “Monitoring and control systems in microcirculation-Part I” supported by the University of Catania. Role: *Principal Investigator*.

(2001- 2002) Two years grant awarded to develop the research project entitled “Innovative Analysis Technique in Neuro-Engineering” supported by the University of Catania. Role: *Principal Investigator*.

International Awards and Invited Speakers

(11-13 September 2019) **Best presentation award** at the Conference Automatica.it 2019 for the paper "Jump resonance in discrete-time systems: theory and applications", Ancona, Italy.

(02-08 June 2019) **Invited lecturer** at Department of Systems and Control Engineering of University of Malta lecture title "Analysis of Bio-signals – Methods and Case Studies" in the framework of the ERASMUS Programme.

(19 November 2018) **Invited speaker** at the Meeting on Lab-On-Chip & Bio-Data Analytics" with a lecture entitled "L'Ingegneria in microfluidica nello sviluppo di dispositivi biomedicali", CNR-ISASI,Pozzuoli, Italy

(13 June 2018) **Invited speaker** at the 26th Nonlinear Dynamics of Electronic Systems conference (NDES 2018) with a lecture entitled "Microfluidics Networks", Catania, Italy

(03 May 2017) **Invited lecturer** at Institute of Signal, Sensors and Systems of the Heriot-Watt University lecture title "Control Engineering in two-phase microfluidics for bio-chemical applications" in the framework of the ERASMUS MUNDUS Programme, Edinburgh, UK

(04 July 2016) **Invited speaker** at the Workshop on Complexity in Engineering 2016 (COMPENG 2016) with a lecture entitled "Complexity in Bio-Microfluidics Engineering", Catania, Italy

(15 April 2016) **Invited speaker** at the meeting of the Accademia Gioenia at the University of Catania with a lecture entitled "Sistemi Bio-Microfluidici", Catania, Italy

(23 April 2009) **Invited lecturer** at the Microfluidics Laboratory for Scientific and Technological Applications (MISCHA) of the Dip. di Scienze Chimiche at the University of Padova, lecture title "Advanced real-time monitoring in bio-microfluidics".

(24-26 June 2002) **Awards as best poster** at the IV International Workshop on Bio-Signal Interpretation 2002with the paper entitled 'A Nonlinear Circuit Architecture for Magnetoencephalographic Signals Analysis',Como, Italy

(25-28 October 2001) **Invited speaker** at the 23rd Annual International Conference of the IEEE Engineering in Medicine and Biology Society' (EMBC 2001), Istanbul, Turkey

(26-30 March 2001) **Grant awarded** to attend the European School on Intelligent Data Analysis (IDA 2001), Palermo, Italy.

(27 June -11 July 1999) **Grant awarded** to attend the 4th International Summer School/Conference 'Let's Face Chaos through Nonlinear Dynamics', Centre for Applied Mathematics and Theoretical Physics (CAMPT) University of Maribor, Slovenia.

Research and Teaching Activity Abroad

(01-06 May 2017) **Visiting Professor** at Institute of Signal, Sensors and Systems of the Heriot-Watt University (Edinburgh, UK) lecture title "*Control Engineering in two-phase microfluidics for bio-chemical applications*" in the framework of the ERASMUS MUNDUS Programme.

(21 September-18 October 2015) **Visiting Professor** at the Dept. of Cognitive and Clinical Neuroscience, Central Institute of Mental Health, Medical Faculty Mannheim, Heidelberg University (DE). The scientific director was the Prof. Dr. Herta Flor, and the course title "*Methods for the identification of complex dynamics in brain signals*" (20 hours).

(November 2013) **Visiting researcher**, at the Microhemodynamics Lab. of the Dept. of Bioengineering at the University of California San Diego (UCSD, USA) for the development ofthe research project "Microfluidic systems for the blood viscosity detection".

(May 2013) **Visiting researcher** at the Dept. of Psychology, National University of Ireland, Maynooth (IR)for the development ofthe research project "Brain Connectivity Analysis in ERP Data". Lecture title "*Development of platforms for brain signal analysis*".

(March 2011 e July 2012) **Visiting researcher** at the Dept. of Cognitive and Clinical Neuroscience, Central Institute of Mental Health, University of Heidelberg (DE)for the development ofthe research project "Graph-Theory Approach for the Identification of Large Scale Dynamical Networks in Neuro-Cognitive Processes", supported by the Vigoni 2010.Lecture title "*Data driven methods for brain connectivity analysis*".

(April 2008) **Visiting researcher** at the Dept. of Computer Science and Mathematics, Faculty of Engineering, University of Exeter (UK) for the development of the research project “Development of methodologies and tools for the investigation of spatio-temporal dynamics in Evoked Potential data” supported by the University of Catania. Lecture title “*Engineering inside the complex phenomena from bio-microfluidics to bio-signals*”.

(April 2008, September 2008) **Visiting researcher** at the Dept. of Electronic and Computer Engineering, University of Portsmouth (UK), for the development of the research project ‘Smart Home Healthcare systems for the elderly’, supported by the British 2008.

(September 2004) **Visiting Researcher** at the University California San Diego supported by the program “Ricerca diffusa – Progetto Giovani Ricercatori” of the University of Catania, working at:

- the Institute of Nonlinear Science in the research project on the ‘Innovative Analysis Technique in Neuro-Engineering’;
- the Microhemodynamics Lab of Dept. of Bioengineering in the research project on ‘Microfluidic systems for the red blood cells tracking’.

(March-July 2000) **Research Scholar** at Institute of Nonlinear Science, the University of California San Diego, within the ‘Agreement of Cooperation between the University of Catania, Italy and the University of California-San Diego’, conducting research in ‘Information Processing in Neural Networks’.

Didactic Activity at the University of Catania

(From 2013 up to now) School of Engineering of the University of Catania teaching “Biomedical Systems and Control” MSc in Automation Engineering and Control of Complex Systems (medium English).

(From 2016 up to now) School of Engineering of the University of Catania teaching “System Theory” (BSc).

(From 2006 up to 2012) School of Engineering of the University of Catania teaching “Fundamentals of Bio-Engineering” (MSc, medium English).

(AY 2011/2012) School of Engineering of the University of Catania teaching “System Theory” (BSc).

(2006-2011) School of Engineering of the University of Catania teaching “Fundamental of Automatic Control” (BSc).

(2008-2012) Contract Professor at Faculty of Medicine and Surgery of the University of Catania, teaching “Bio-Engineering” (MSc).

(2007-2010) Contract Professor at the Specialization School in Pharmacology, Faculty of Medicine and Surgery of the University of Catania, teaching the course of “Medical Informatics”.

(AY 2007/2008) Contract Professor at the Master in “Technology and Molecular Imaging in Biomedicine” of the University of Catania, teaching the course of “Biomedical Engineering”.

(2000 -2006) Contract Professor at the School of Engineering of the University of Catania teaching **8 courses** in the scientific field of “Automatics”.

(From 2006 up to now) Supervisor of more than 100BSc and MSc final projects.

(From 2002 up to now) Supervisor of 8PhD theses in the course ‘Electronic and Control Engineering’

Affiliations

(From 2018) Member of the IEEE Technical Committee on Cellular Nanoscale Networks and Array Computing (CNNAC)

(From 2016) Member of the Accademia Gioenia at the Università degli studi di Catania

(From 2016) Member of the Consortium “Instituto Nazionale di Biostrutture e Biosistemi (INBB)”

(From 2009) Senior Member IEEE.

(2004-2005) Counsellor of the IEEE Student Branch, University of Catania.

(From 2007) Member of Italian Society in System and Control (SIDRA).

- (18-20 May 2000) 8th Annual Workshop on Nonlinear Dynamics of Electronic Systems (NDES'2000), Catania.

Research Activity

The research activity carried out, mainly related with the areas described below, is summarized in 2 Books, 5chapters in International Books, 47 papers in International Journals and 81 papers presented at International Conferences. The different activities are developed at the *Control Engineering in Bio-Science Lab* at the University of Catania (<http://www.dees.unict.it/mbucolo/>). working in collaboration with different international research partners and enterprises.

Modeling and Control of Two-Phase Microfluidic Processes and Applications, in collaboration with:

- (Since 2000) Prof. Marcos Intaglietta, Micro-hemodynamics Lab - UCSD, USA
- (Since 2007) Dr Andreu Llobera, Instituto de Microelectrónica de Barcelona(CNM), Spain
- (Since 2017) Prof. Maiwenn Kersaudy-Kerhoas, Heriot-Watt University, United Kingdom

Strategies for the Analysis and Identification of Brain Dynamics, in collaboration with:

- (Since 2000) Dr David Shannahoff-Khalsa, BioCircuits Institute (former Inst. of Nonlinear Science), UCSD, USA
- (Since 2007) Prof. Richard Everson, Dep. of Computer Science and Mathematics, University of Exeter, UK
- (Since 2009) Prof Richard Roche, Dep. of Psychology, National University of Ireland, Maynooth, Ireland
- (Since 2010) Prof. Herta Flor, Dep. of Cognitive and Clinical Neuroscience, University of Heidelberg

Portable Device for Real-Time Diagnosis and Control of Heart Dynamics, in collaboration with:

- (Since 2008) Prof. Branislav Vuksanovic, Dep. of Electronic and Computer Engineering - University of Portsmouth, UK

Decision Supporting System for Production Planning Control, in collaboration with:

- (Since 2001) ST-Microelectronics- Catania site, Italy
